SUPPLEMENTAL DETAILED ACTION

1. Receipt is acknowledged of the amendment filed 10/017,655 in which claims 1-10 and 12-20 were amended, claims 21 and 22 were added, and claim 11 was canceled.

Claim Objections

2. Claim 12 is objected to because of the following informalities: lines 2-3, "type" should be deleted. Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Li et al, US Patent No. 5,672,858, in view of Giordano et al, US Patent No. 6,321,990.

Li et al disclose an apparatus and method for reading indicia using charge coupled device and scanning laser beam technology comprising: a photodetector 409 for detecting the reflection of light 440 from the scanning light beam 430 off the UPC symbol 411; a CCD 404 separately images the reflected light 440 from the UPS code symbol 413; a processor 420, includes a conventional decoder 420a and symbol discriminator 420b, the discriminator 420b determines if the symbol 413 being read by the CCD is of a particular symbology type, e.g. a matrix code conforming to UPSCODE(TM) symbology; a processor 424, including a conventional decoder 424a and symbol discriminator 424b, is provided to determine if the symbol 411 being read by the photodiode 409 is of a particular symbology type, e.g. a bar

code conforming to a UPC code symbology. (see figure 4B and col. 13, line 17+).

Li et al fail teach in the background that if successfully and completely decoded the decoding process terminates and an indicator of a successful read (such as green light or audible sound) (see col. 4, lines 3-14), but fail to disclose or fairly suggest that the indication means of the reader are LEDs (i.e. photo, illumination, lights) or vibration signal for indicating a valid read.

Giordano et al disclose a scanner with shock-absorbing canopy overmolded with linear of housing comprising: means for indicating a successful decode, wherein the indication includes diodes 236, 238, or sound (beeper), or a vibrator for generating a vibrating signal to alert an operator (see col. 7, lines 54-59).

In view of Giordano et al's teachings, it would have been obvious for a person of ordinary skill in the art at the time the invention was made to incorporate the well-known diodes (LED), sound, or vibration indicating means, as means for indicating to an operator when a valid scan occurs. Such modification would make the system more effective and more practical by providing the LEDs or a vibrator for validating each scan of the system. Furthermore, the teachings of Giordano show that these indication means could be used interchangeably, within the art, for alerting operators. Therefore, it would have been an obvious extension as taught by Li et al.

Response to Arguments

5. Applicant's arguments with respect to claims 1-10 and 12-20 have been considered but are moot in view of the new ground(s) of rejection.

The limitation "photo" indicator or illumination required further search.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
